# JAMES EARLEY

**34-year-old James Earley has been a Street Life Soccer participant for five years. He explains how the programme has helped him to get back on track.**

"I was heading down a path of destruction, my marriage was over and I was broken-hearted. I started to slip back into old habits and didn't see a way out.

"It was the support of the Street Life Soccer programme that got me through, the lads encouraged me to keep strong and supported me. Now I am enjoying my football a lot more, I have got a lot fitter and I was recently selected

to represent England at St George's Park as part of the Street Football England Team. I played various fixtures there, stayed in luxury accommodation and met some great people who I'm still in touch with. I experienced things I never thought I would before.

"My confidence has been built up so much that last month I stood up and spoke about my life and the progress I've made in front of an audience of people. My life is finally back on track and I am feeling happy, motivated and positive about my future."
